

Proposal For Service

PREPARED FOR:

Cleveland Metroparks

8701 Lakeshore Blvd.
Cleveland, Ohio 44108

PREPARED DATE

Jun 08, 2021

Filta Advanced Fryer Solutions proposes to service grease interceptors at Big Met, Shawnee Hills, Seneca, Merwins, Emerald Necklace and Huntington Beach. These units hold between 750 to 1000 gallons. The cost will be \$300.00 to do the initial clean out and \$250.00 to maintain quarterly.

Mastic Woods, Sleepy Hollow, Millstream and East 55th each have a smaller, 30 to 50 gallon in volume, under sink grease trap. These can be serviced for \$150.00 quarterly.

A Metropark location that wishes to have this service and is not listed can be added prior to the scheduled route cleaning.

A Metropark location can be added after the scheduled route cleaning starts with four weeks notice.

A Metropark location can have an additional service in-between quarterly cleanings for the cost of the service plus an additional trip fee of \$150.00.

We will need to reach each grease trap or interceptor with a 100 foot hose. It may be necessary to pull onto the concrete area surrounding sites to reach some locations . We will be mindful of newly poured surfaces and careful not to disrupt operations.

Once the quote is accepted, it will take 2 weeks to produce a schedule. If it becomes necessary to obtain a key for morning access into facilities, we ask for your cooperation in doing so.

Agreed and Accepted,

Brian M. Zimmerman Chief Executive Officer 6/15/21
